PREFACE

This standard work of reference has taken a new departure in its compilation. It is quite original in style and method and no pains have been spared to make it as compact, perfect and reliable as possible. Every attempt has been made to insert in this handy volume as many useful references as are found in a Hindi Encyclopaedia, with the valuable addition of equivalent English words and synonyms for all words, phrases and idioms &c. in current use.

The part of speech of a word is placed next to the main word, and where a word is used in more than one part of speech, the same has been separately inserted and suitable English word for the same has been attached thereto.

All the words in literary and conversational Hindi, modern and ancient, have been included in the work. The prevalent terms of all sciences, e.g. astrology, mathematics, astronomy, art, literature, music &c. have been rendered into English. Latin words for plants, fruits, medicines &c. have also been inserted along with the usual English words.

Several useful appendices as well as a comprehensive list of modern weights and measures have also been appended.
